RE: World Management Survey on management practices and productivity

Dear Professor Van Reenen,

This is to confirm the support of Sveriges Riksbank for the new wave of the World Management Survey to study how management practices shape productivity. The determinants of productivity are key for our understanding of inflation dynamics in Sweden and abroad, and your past work has made important contributions to this knowledge. I am happy for you to mention our support when contacting firms in Sweden.

Sincerely,

Ulf Söderström
Head of Research
Sveriges Riksbank
